

Calculation Tree - Textfile::text

File View Display Help

- Assignment Flow
- Assignment List
- Variable Dependencies
- Variable Table

The Calculation Tree analyzes the data flow related to a specific variable.

The Variable Dependencies view shows the variables and functions which contribute to a variable's value.

Details about the focus (red) variable or function are shown, as you click around the graph.

```

Textfile::text
  textfile.cpp
  Textfile::Textfile      23: text = 0;
  Textfile::open          72: text = (wchar_t*) (filestring+2);
                          74: text = ASCIItoUnicode((unsigned char*) filestring, filesize);
                          76: text = UTF8toUnicode((unsigned char*) (filestring + 3));
                          78: text = UnicodeBEtoUnicode((unsigned char*) (filestring + 2));
                          86: text = 0;
  Textfile::close         139: return out;
  Textfile::UTF8toUnicode
  Textfile::ASCIItoUnicode 156: return out;
  Textfile::UnicodeBEtoUnicode 170: return (wchar

```

All of instances of the variable being set are listed.
